Subject RE: record Storage Room

History: This message has been replied to.

Mitch- are you looking for a qualitative or quantitative evaluation. Amy can reduce all the survey data into tables, but they did not record any transferable contamination or high static measurements in the record storage room. If you need her to provide a table with the data, she'll need a couple days to get that together as she'll have to fit that in with her other activities on site. If you need just a qualitative evaluation and procedures for Harry's entry, we can get that together quickly. Let me know. In my discussions with her, the records room is OK- there's just other items on the floor that are contaminated and need to be kept away from.

Also, They were able to get some wipes in ductwork in the second floor - some had removable panels. The wipes were then scanned with the hand-held instrumentation- no elevated readings were observed. Since no high readings were recorded, smears were not brought back for counts. We can do a little more in the ducts if needed (maybe get some extensions to get further into the ductwork).

Andy

OK. Let's aim to have Harry access the SLC-Main Building-2nd floor record storage room on 9/11/06. The purpose of access to that room is to identify/review records of importance to the SLC civil investigation.

Andy: Can you have Phil (or another qualified person) review the results for the record room, and provide an evaluation of what health and safety concerns exist for entry into the record storage room? If health and safety concerns exists, what procedures should be implemented to protect personnel entering this area? When can this evaluation be ready (what date)?

Cristina Fernandez is the Radiation Safety Officer for EPA Region III. I'd like her to review this TTNUS submittal, and provide Harry and myself with her opinion. We'd like to hear Jeff's opinion as well.

Please let me know at your earliest convenience,

Mitch

record Storage Room

Subject

Hey Mitch,
8/31 works for me at SLC. Let me know how it plays out. Thereafter, I
couldn't return until after Labor day.
